II. PROFESSIONAL EXPERIENCE

Web Developer (Full-Stack)

Mepangilinan Real Estate Brokerage Corporation — Circuit Corporate 1 Makati City, Philippines
April 2026 – Present

- Responsible for the development, deployment, maintenance, and ongoing management of the company's websites.
 - *Developed one of the company's websites as a full-stack application, handling both front-end and back-end development, including PHP-based backend functionality and MySQL database integration.*
- Independently handle website deployment through GoDaddy, as well as ongoing maintenance, updates, troubleshooting, and technical improvements.
- Proficient in version control and use it to manage source code, track changes, maintain project history, and support a structured development workflow.
- Conduct administrative assistance by: creation and management of employee email accounts, designing of business cards and other digital materials for company events, and preparation of meeting reports and presentations, among others.

Test Engineer

Digi-plus Interactive Corporation — BGC Taguig City, Philippines
September – November 2024

- Executed manual test cases to identify software defects and ensure that application functionality met the requirements.
- Collaborated with developers and QA team members to report, track, and resolve software bugs.
- Documented test cases, test results, and defect reports to maintain accurate testing records.
- Assisted in functional and regression testing to ensure system stability after updates.
- Analyzed test results to identify issues and improve software quality and performance.

III. LEADERSHIP EXPERIENCE

SK Kagawad

Barangay Rizal — Taguig City, Philippines
November 2023 – August 2025

- Implemented various community programs and initiatives that improved youth participation and engagement in barangay activities such as health and sports programs.

- Assisted in planning and executing youth development projects, ensuring efficient use of resources and timely completion.
